9:30-7:30

Tues/Thurs

9:30-6

Sat 9:30-3:30

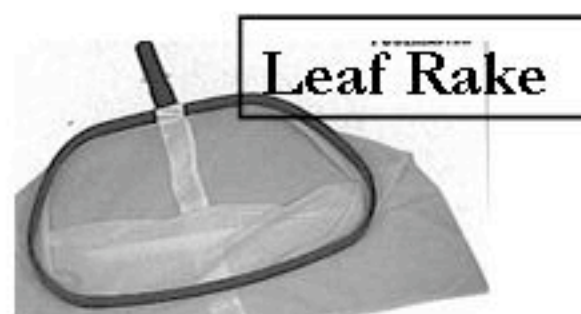

Aqua Rite Electronic Chlorine Generators

OPEN YOUR POOL QUICK & EASY

Here are steps to make opening your pool easy:

1. Start filling your pool today. (Even people on wells won't have to haul in water.)
2. Open your pool as early as possible. It costs less to maintain a clear pool than to clean a green, ugly one.
3. After your pool is completely filled, bring a water sample to Pools Patios & Porches for testing.
4. Take an inventory of your chemicals, test kits and accessories before you depart to the store.

5. Remove leaves and worms with a Leaf Rake or Leaf Master.
6. If there is debris, vacuum your pool manually before adding chemicals. Do NOT use automatic pool cleaners to perform this task.

7. Balance the water. Alkalinity, calcium and pH allow your sanitizer to work more efficiently, help your pool surface to last longer, and prevent eye irritation.
8. If the water is green—consult our staff before wasting shock and algaecide.

Pools Patios & Porches recommends you FLOC it and vacuum to waste. This process quickly clears your water. **ASK US FOR DETAILS**

9. Regardless of the chemical system you are using, **double** shock your pool.
10. Add algaecide and a metal control upon opening to eliminate future problems with algae and cloudy water.
11. AND IF TIME DOES NOT PERMIT OR YOU FEEL OVERWHELMED -

Schedule your Pool Opening with us today!

SUSTAIN - 5 Minutes per Week Pool System

Summer Shield—Creates a reserve, or back-up, of chlorine fighting power, that is released on-demand whenever routine sanitizing levels drop, like after a rainstorm or pool party. **Add once a season.**

1

3" BLUE Chlorinating Tablets—contain a unique erosion modifier that allows them to deliver chlorine more consistently than conventional white tablets. Dispenser cup gets refilled **once per week** and is placed in the skimmer.

2

3/4 Inch Shield Energizer Tablets—replenishes your Summer Shield reserve bank of chlorine protection and makes shocking your pool simple and effective. Apply **once per week** in your skimmer.

3

- ◆ Easy as 1-2-3
- ◆ Crystal clear water
- ◆ **No Algae Guarantee**
- ◆ **Costs less** than ordinary tablet maintenance programs
- ◆ Uses less balancing chemicals
- ◆ Requires **NO** shock or algaecide
